Profile Building

Assignment

Assignment Questions
1.What is the difference between UI and UX?

The look and feel of an application or website is known as the user interface, or UI. It's the aesthetics—buttons, colours, and overall layout.

User Experience, or UX, refers to how something functions and feels for the user. It's the whole experience—how simple and fun a website or app is to use, from responsiveness to navigation.

2. Who is a frontend developer?

A frontend developer builds the visual style of websites and applications, much like a digital artist. They create and construct the components that you see and use, like buttons, layouts, and images, ensuring that everything is visually appealing and functions properly for users.

3. Who is a backend developer?

A backend developer might be viewed as the unseen

architect. They handle data processing, storage, and smooth operation on the server side of websites and applications. Although users are blind to their labour, it is essential to the website or app's operation.

4.Create your own GitHub & LinkedIn accounts.
share the screenshot of both of your accounts and
share your profile links of GitHub & LinkedIn in the solution.
